JILLY SAYS

PRODUCT FEATURES MAKE THE DIFFERENCE

LAWN RAKE (Item No. 3) To look after your lawn properly you need to mow it just once a week throughout the summer. The lawn will benefit from a vigorous raking of the grass to remove dead matter, moss and weed which disfigure a lawn. The build-up of dead grass provides a mat of absorbent fibres which prevents water getting through to the ground, and if kept waterlogged it will encourage disease and prevent healthy growth.

3 LR400A
